CORPS OF ENGINEERS OFFICES RELOCATE

Oct. 21, 1999 -- The Army Corps of Engineers will begin moving next week from downtown Charleston into temporary offices in North Charleston. The address of the new location is 4600 Goer Drive, North Charleston, SC 29406. It is near the Interstate 26 Montague exit. The former location, the L. Mendel Rivers Federal Building, is being permanently closed as a result of roof damage from Hurricane Floyd.

In order to continue all operations, the move is planned in phases. The first group will begin moving October 26. Most engineers as well as the permitting functions will be included in the first group, which is expected to be operating at the new facility on Nov. 2. The final group is expected to be at the new location by November 21.

Although the Corps will have new telephone numbers, calls to all current numbers will be transferred to the new location. For additional information refer to the Corps web address at www.sac.usace.army.mil.
